

I hope you realize you woke a sleeping bear!

I oppose changing the qualifications for voting by absentee ballot for the upcoming November election by using the mere existence of COVID-19 as an excuse to vote absentee. This clearly undermines the integrity of our election process. Our constitution is very clear on eligibility for voting by absentee ballot i.e. your illness, not someone else's.

Doubling down on a goal to perform another mass mailing of absentee ballot applications is an affront to an orderly and efficient process.

The bears, momma and otherwise, are awake and you will be responsible for the down fall of trust in Government for 100 years- we will not forget - vote no!
